

Limitless Colors – Pricing for powder coatings

For conventional powder coatings with RAL colors, without special textures and color variations, with a minimum amount of EUR 5.000,- the same price as for our black (DP-xxx) or white articles (SF-xxx) will be considered. If the total amount is less than this, a surcharge of EUR 490,- will be charged.

Extra calculations are required,

- a) if special textures (e.g. hammer finish or similar)
- b) or special powder coating colors (e.g. metallic or similar) are used.

We would like to point out that when reordering articles in special colors, those must be calculated as new orders and for this reason the original prices cannot be assumed.

Base material is always stainless steel. The standard finish is matt fine structure. If a different gloss level is required, this must always be announced.
